- Communication
- Multi-tasking

Extra-curricular Activities

- **Rahat Event**

I will be work as the Rahat Event Coordinator. In this event, We have distributed the sweatshirts, Tshirts, books and some food grains to the poor peoples near our college and also the nearer villages to shirpur.

- **RCPIT Converges 2k23**

In this event, I work as the website developer for the RCPIT Converges 2k23. In this we work as a team of Four students. This website also has the payment integration. Unless that, I have also participated in the Subevent of Converges which is a Detective Dilema.

About Me

A software engineer, who is seeking to find an opportunity to work in fun and challenging working environment that will encourage me to improve and learn new and necessary skills as well as to be motivated by the company to do his best for the sake of helping himself and company advancement in the software engineer industry.

Education Background

R.C.Patel Institute of Technology, Shirpur
B.Tech. Computer Engineering and Technology
Completed in 2024

Projects

- **Portfolio Website using MERN**

In this website, we used the HTML,CSS,React for the Design and fronted. for the Backend I have used express and Node. This is the dynamic Website where only the website owner or admin are able to change the detail, add/delete project for that admin also have to authenticate. The login details and project information are saved in the MongoDB Database.

- **Charitable Trust Website with Payment gateway using React**

This website is created using a React framework in JavaScript. In this website I have created a website for the charitable trust named Saksham. for the payment gateway the rozarpay api is used. On this site, the user can donate the amount that he wants to by using rozarpay and the money will be transfered to the charitable trust account and user get the donate bill on there email.

- **Converges Website**

This project is created for the national level college event Called Converges 2k23. In this we have work as a team of four students. In this project we have several sections for each sub event comes under that event. this website is live on our college website. this website also has the payment gateway.

- **TODO List application using Js**

In this project, I have created a TODO list web-app using Js. In this project user can add the task and after completion user can delete the task by this user can list the task they want to do. also there is an remainder for the task to be done.
